Education

Amity University, Master of Computer Applications (MCA) - AI/ML, July 2024 - July 2026

- CGPA: 8.63/10

Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, Python

Frontend: React.js, Next.js, **Responsive Design**, **Cross-Browser Compatibility**, Frontend Performance Optimization, REST APIs

Frontend Practices: Mobile-First CSS, Cross-Browser Testing (Chrome, Firefox, Safari), Lighthouse Audits, Lazy Loading & Code Splitting, Grunt/Gulp

Backend & APIs: Node.js, Express.js, FastAPI, JWT, OAuth2

Databases: SQL, MySQL, PostgreSQL, MongoDB

Tools & Practices: Git, Unit Testing, Object-Oriented Programming (OOP), Data Structures and Algorithms

Experience

Full Stack Intern, Pinnacleway - Gurugram, India, April 2026 - August 2026

- Enabled secure access for thousands of users by engineering signup/login and admin-management **authentication** in **NestJS** across a **100k+ line** enterprise codebase.
- Simplified third-party integration by designing and documenting **20+ RESTful APIs (Swagger/OpenAPI)** with SQL query optimization and complete technical documentation.
- Cut deployment time **33%** (30 to 20 min) by automating CI/CD via **GitLab** and **Git** workflows, with **JWT/OAuth 2.0** auth and real-time WebSocket messaging.

Full Stack Intern, Keltratech - Noida, India, January 2025 - August 2025

- Delivered **3+ responsive, cross-browser compatible** interfaces (Chrome, Firefox, Safari) using **React (Vite)**, JavaScript, and **TypeScript**, built **mobile-first** from designer mockups alongside a UX/UI team.
- Improved **frontend performance** via lazy loading, code splitting, and **Lighthouse**-driven audits; boosted maintainability by **30%** through modular component refactoring and Grunt/Gulp build tooling.
- Sustained **99.9% uptime** by developing **RESTful** Node.js/Express services with JWT auth, reinforced through **unit testing** and **Git**-based code reviews.

Projects

BridgeTalk Real-Time Multilingual Chat App - bridgetalk.leeze.com, [GitHub Link](#)

- Built a real-time full stack chat application end-to-end using **React.js**, **Node.js**, Firebase, and Tailwind CSS, hosted on Vercel.
- Implemented translation across **6+ languages** via **API** integration; validated at **1,000+ msgs**, **sub-2s** delivery.

Hall Guard Cloud-Connected Security Platform - hallguard.in

- Built **HallGuard**, a **local-first** browser extension for **3+ AI platforms** (ChatGPT, Claude, Gemini) with real-time paste/submit/upload interception and **Allow/Warn/Block/Redact** policy in **React**, **TypeScript**, **Plasmo**, and **Chrome APIs**.
- Engineered a **4-layer detection engine** with a **16-feature scikit-learn** classifier scanning **256 KiB** locally per request, eliminating network round trips at **zero network latency**.
- Deployed a **4-component system** (extension, **React/Vite** frontend, **Node.js/Express/MongoDB** API, **ML** pipeline) on **AWS** and **Vercel** via **GitHub Actions CI/CD**, secured by **JWT/RBAC** and **Ed25519/SHA-256** signed updates.

File Whisper GenAI Document Chat Dashboard, [GitHub Link](#)

- Built a GenAI document chat dashboard for PDF/DOCX interaction, integrating Hugging Face API prompts with structured response flows for 10+ authenticated test users at **95%+ response accuracy**.
- Provisioned per-user file storage and serverless processing on AWS Lambda and S3, increasing test session duration from 1 to 3+ minutes.
