github.com/vishalvishwas01

Education

Amity University, Master of Computer Applications (MCA) - AI/ML, July 2024 - July 2026
- CGPA: 8.63/10

Skills

Languages: Python, JavaScript, TypeScript, Go, HTML5, CSS3, Tailwind Css

Frontend Frameworks: React.js, Angular.js, Next.js

Backend & APIs: Node.js, Express.js, NestJS, JWT, OAuth2, REST APIs, FAST APIs, Multi-threading, CI/CD

Tools & Cloud: Git, Claude, GitHub Actions, Docker, Kubernetes, AWS, Azure, Digital Ocean

Databases: SQL, MySQL, PostgreSQL, MongoDB, Neo4j, Redis

Practices: Object-Oriented Programming (OOP), Data Structures and Algorithms, Unit Testing

Experience

Software Engineer Intern, Supercode - Bengaluru, India, September 2026 - Present
- Engineered a production-grade microservice for **Aether** handling **10,000** requests/sec, blocking 43% of malicious traffic through rate limiting and DDoS mitigation using Node.js, Python, Flask, Docker, and Kubernetes.
- Reduced **API latency by 90%** from 10 seconds to under 1 second by optimizing authentication and request-processing workflows, deploying scalable services with **Kubernetes and multithreading.**

Full Stack Intern, Pinnacleway - Gurugram, India, April 2026 - August 2026
- Enabled secure access for thousands of users by engineering signup/login and admin-management **authentication** in **NestJS** across a **100k+ line** enterprise codebase.
- Simplified third-party integration by designing and documenting **20+ RESTful APIs** (**Swagger**/**OpenAPI**) with SQL query optimization and complete **technical documentation**.
- Cut deployment time **33%** (30 to 20 min) by automating **CI/CD** via **GitLab**, with **JWT/OAuth 2.0** auth and real-time **WebSocket** messaging.

Full Stack Intern, Xeltratech - Noida, India, January 2025 - April 2025
- Delivered **3+ cross-browser compatible** (Chrome, Firefox, Safari) full stack interfaces using **React** (Vite) and **JavaScript** with **mobile-first, responsive CSS**, collaborating with the **UI/UX** team on Framer Motion animations.
- Boosted maintainability by **30%** by refactoring modular architecture, streamlining **Grunt**/**Gulp** front-end build pipelines, and building **Python** scripting utilities for debugging.
- Sustained **99.9% uptime** by developing **RESTful** Node.js/Express services with JWT auth, reinforced through **unit testing and code reviews**.

Projects

Hall Guard Cloud-Connected Security Platform - hallguard.in
- Built **HallGuard**, a **local-first DLP** browser extension for **3+ AI platforms** (ChatGPT, Claude, Gemini) with real-time paste/submit/upload interception and **Allow/Warn/Block/Redact** policy in **React**, **TypeScript**, **Plasmo**, and **Chrome APIs**.
- Engineered a **4-layer detection engine** with a **16-feature scikit-learn** classifier scanning **256 KiB** locally per request, eliminating network round trips for detection of sensitive data, **prompt injection**, and scams at **zero network latency**.
- Deployed a **4-component system** (extension, **React/Vite** frontend, **Node.js/Express/MongoDB** API, **ML** pipeline) on **AWS** and **Vercel** via **GitHub Actions CI/CD**, secured by **JWT/RBAC** and **Ed25519/SHA-256** signed updates.

BridgeTalk Real-Time Multilingual Chat App GitHub Link
- Created a real-time full stack chat application using **React.js**, **Node.js**, Firebase, and Tailwind CSS, hosted on Vercel.
- Implemented translation across **6+ languages** via **API** integration; validated at **1,000+ msgs**, **sub-2s** delivery.
