Education

Amity University, Master of Computer Applications (MCA) - AI/ML, July 2024 - July 2026

- CGPA: 8.63/10

University Of Delhi, Bachelor of Commerce (B.Com) - Commerce, July 2019 - July 2022

- CGPA: 7.51/10

Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS

Frameworks & APIs: REST APIs, Full Stack Development (React.js, Next.js, Node.js, Express.js, FastAPI), **Git**, JWT, OAuth2

Databases: SQL, MySQL, PostgreSQL, SQLite, MongoDB, Vector Databases

Cloud & Systems: AWS (S3, EC2, Lambda), CI/CD, GitHub Actions, Docker, Redis

Data & AI/ML: LLM, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Prompt Engineering

Practices: Unit Testing, Object-Oriented Programming (OOP), Data Structures and Algorithms

Experience

Full Stack Intern, Pinnacleway - Gurugram, India, April 2026 - August 2026

- Enabled secure access for thousands of users by engineering signup/login and admin-management **authentication** in **NestJS** across a **100k+ line** enterprise codebase.
- Simplified third-party integration by designing and documenting **20+ RESTful APIs (Swagger/OpenAPI)** with SQL query optimization and complete **technical documentation**.
- Cut deployment time **33%** (30 to 20 min) by automating **CI/CD** via **GitLab**, with **JWT/OAuth 2.0** auth and real-time **WebSocket** messaging.

Full Stack Intern, Xeltratech - Noida, India, January 2025 - July 2025

- Delivered **3+** responsive full stack interfaces using **React** (Vite) and JavaScript, optimized for desktop and mobile with Framer Motion animations.
- Boosted maintainability by **30%** by refactoring modular architecture and building **Python** scripting utilities for debugging.
- Sustained **99.9% uptime** by developing **RESTful** Node.js/Express services with JWT auth, reinforced through **unit testing** and **code reviews**.

Projects

Hall Guard Cloud-Connected Security Platform - hallguard.in

- Built **HallGuard**, a **local-first DLP** browser extension for **3+ AI platforms** (ChatGPT, Claude, Gemini) with real-time paste/submit/upload interception and **Allow/Warn/Block/Redact** policy in **React**, **TypeScript**, **Plasmo**, and **Chrome APIs**.
- Engineered a **4-layer detection engine** with a **16-feature scikit-learn** classifier scanning **256 KiB** locally per request, eliminating network round trips for detection of sensitive data, **prompt injection**, and scams at **zero network latency**.
- Deployed a **4-component system** (extension, **React/Vite** frontend, **Node.js/Express/MongoDB** API, **ML** pipeline) on **AWS** and **Vercel** via **GitHub Actions CI/CD**, secured by **JWT/RBAC** and **Ed25519/SHA-256** signed updates.

BridgeTalk Real-Time Multilingual Chat App - bridgetalk.gleeze.com, [GitHub Link](#)

- Created a real-time full stack chat application using **React.js**, **Node.js**, **Firebase**, and **Tailwind CSS**, hosted on **Vercel**.
- Implemented translation across **6+ languages** via **API** integration; validated at **1,000+ msgs**, **sub-2s** delivery.

File Whisper GenAI Document Chat Dashboard, [GitHub Link](#)

- Integrated Hugging Face API prompts with document context handling and structured response flows for 10+ authenticated test users.
- Launched a GenAI document chat dashboard for PDF/DOCX interaction with 95%+ response accuracy during project testing.
- Provisioned per-user file storage and serverless processing on **AWS Lambda** and **S3**, increasing test session duration from 1 to 3+ minutes.
